

SPECIFICATION

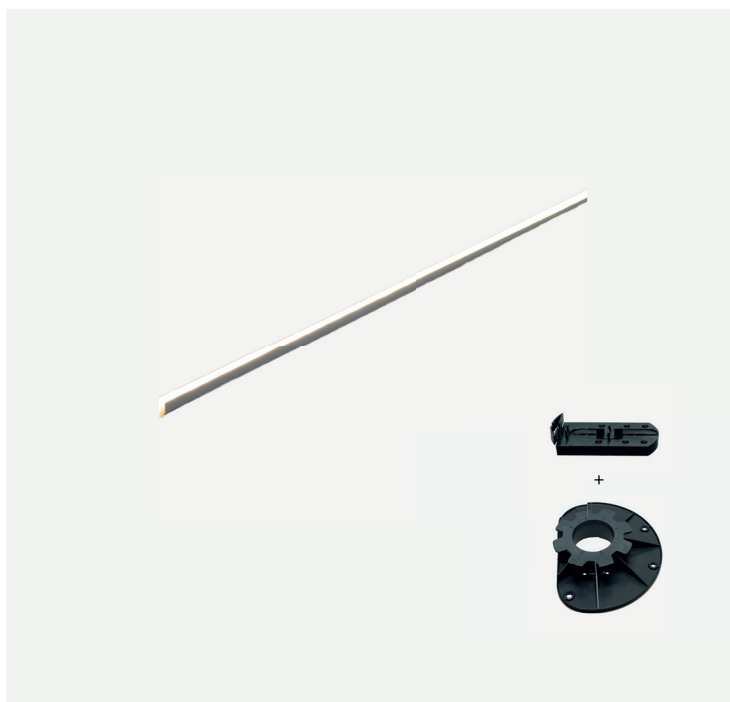

The LUNISOL L LED strip profile is available in one length only, namely 1 m. The LED strip itself is available in several sizes and in one colour.

The LED strip is inserted into the profile and then connected to the Casambi by means of a cable. The Casambi is then connected to the transformer from the LUNISOL range.

The LED strip is used for edge lighting. For installation, combine an adjustable AK terrace pedestal with the CML top plate. The LUNISOL L LED strip can then be easily placed on the top plate.

The maximum installation height with transformer is 4 cm.

Profile width	0,80 cm
Profile length	1 m
Available Led strip lengths	1 m
	2 m
	3 m
	4 m
	5 m
	custom-made
